MESSAGE

It is heartening to know that Bureau of Police Research & Development is publishing its annual publication "Data on Police Organisation" (DoPO) as on January 01, 2018.

2. Policing in a democratic society has to be evidence based in order to achieve its core purpose of public safety, security and maintenance of Law and Order. It has to be SMART enough to adapt itself to the dynamism of the modern era. Hence, DoPO assumes a very crucial place in planning towards capacity building in terms of infrastructure, training, research and other affiliated domains.
3. DoPO contains major data on various aspects of Police functioning. Police Organisations, Government agencies, Research scholars and Academicians find "Data on Police Organisation" very useful.
4. Publication of DoPO is an outcome of collaboration between BPR&D and Heads of CAPFs/Police Forces of States and UTs. I am sure this publication shall not only meet the expectations of all the Stakeholders and the users groups but also provide something more.
5. I wish all the very best to Bureau of Police Research and Development and all its members.

MESSAGE

The mission of Bureau of Police Research & Development (BPRD) is to produce relevant, high-quality research for improvement of policing in the country and the related services to the citizens. Availability of accurate data and in time, is a prerequisite to achieving this mission, as also for evidence-based policy-making and undertaking scientific research. Data helps to create a 'big picture' of policing, and is useful to study macro and micro trends, indicators, develop statistical models and undertake comparative analysis. This is the need of the hour. The current edition of **Data on Police Organizations** is a step in this direction.

2. This compilation is a valuable source of data on different aspects of policing, including the physical, financial and human resources of different Police Forces in the country. The Report collects and compiles data from various sources, which can be used as objective inputs for better planning and improved decision-making, for example, in allocating resources for building police infrastructure. This data can also be used to undertake rigorous empirical research on policing in the country.

3. The publication of this edition of **Data on Police Organizations in India** is the outcome of a huge collaborative exercise between the Ministry of Home Affairs, the Heads of CAPFs, and the Director Generals/Inspector Generals of Police of the States and UTs. They furnished the requisite data pertaining to their States/UTs, and also had it vetted when requested by the Bureau.

4. The rich inputs provided by the senior officers of the Bureau, and the careful compilation and analysis done by the statistical officers were indispensable to the production of this report. The guidance of Shri N R Wasan, former DG BPR&D was invaluable in bringing out this publication.

5. I hope that this publication will prove useful to planners, policy makers, police administrators, researchers and academicians alike. Any suggestions for improvement of the publication in future are always welcome.

MESSAGE

I am glad to present the latest edition of our flagship publication “Data on Police Organizations in India” (DoPO) as on 01.01.2018. “Data on Police Organizations in India” (DoPO) has been published annually by the Bureau of Police Research and Development (BPR&D) since 1986.

DoPO contains data related to various aspects of Police Forces of the States/UTs, CAPFs and other Police Organizations. Over the past decades, this publication has become quite well known and its release is eagerly awaited every year. Collection and analysis of the data received from States/UTs and CAPFs is an extensive exercise where coordination, accuracy and reliability is our prime concern.

Publication of this edition of **Data on Police Organizations in India** is an outcome of the collaborative efforts of our BPR&D, Heads of CAPFs, and Chiefs of Police of all States and UTs, who have not only furnished the requisite data pertaining to their States/UTs but also had it checked and rechecked as and when requested for by the Bureau. Shri N.R Wasan, Ex DG, BPR&D, has put in commendable efforts in revamping and revising the contents of this publication. I also acknowledge the guidance of former DGs of BPR&D, Dr. A.P Maheshwari and Shri Sudeep Lakhtakia, during the preparation of this edition of DoPO.

I am sanguine that this publication will help in arriving at appropriate policing strategies for dealing with the challenges, both present and future. It would meet the requirements and expectations of the Policy Makers, Researchers, Law Enforcement Agencies, Social Scientists, NGOs, the general public, and other stakeholders, as empirical flagposts.

I would appreciate if the readers could kindly send their suggestions to us for further improving the content and quality of the publication.

This section provides information regarding the purpose of this publication, user guide to Indian Police Statistics, data source and quality, statistical tools, procedure of data collection, data limitation and implications.

Purpose of publication:

BPR&D has been publishing the “Data on Police Organisations” in India since 1986 annually. From time to time, some of the important features like women police, police expenditure, citizen constabulary ratio, transport facilities, communication facilities, representation of SCs/STs and police training centers were also added.

In this publication new dimensions like infrastructure of CAPFs (vehicles availability, family quarters, training, trackers & sniffer dogs and pay scales), Gender Wise data of Police Forces, District Armed Reserve Police Force, Senior Supervisory Officers, Immediate Supervisory Officers and Field Staff Ratio of Police Strength, Database of Women Police, Sanctioned and Actual Strength of SCs/STs and OBCs have been added.

This publication “Data on Police Organisation in India” as on 01.01.2018 is useful for its user specially the policy makers, police officers, researchers, libraries, academicians, police administrators and other stakeholders.

Data Collection Procedure:-

BPR&D’s annual publication “Data on Police Organisation in India” (DoPO) has been prepared on the basis of data provided by States/UTs, CAPFs, other police organisations. Further data have also been obtained from Registrar General of India (RGI) and Survey of India.

Statistical Tools:-

Statistical methods involved in carrying out a study includes planning, designing, collecting data, analyzing, drawing meaningful interpretation and reporting of the findings.

Presentation of Data:-

Data are collected in a raw format, however in this format, it has inherent difficulties towards its understanding. Therefore, raw data have been summarized, processed, analyzed and presented in charts & tables.

The graph is a very effective visual tool as it displays data at a glance, facilitates comparison and can reveal trends and relationships within the data such as changes over time, frequency distribution and correlation. Bar graphs, Pie charts and other statistical tools have been used.

Data Limitations:-

DoPO has been prepared on the basis of data provided by States/UTs/ CAPFs and other Police Organisations.

Since the Police structure of all States/UTs, CAPFs and other Police are not same, in a few cases states have not been able to provide complete data. Consequently it has been mentioned as 'Not available' (NA) in relevant Tables and at some places relevant previous year data has also been incorporated.

SECTION- II: INDIAN DEMOGRAPHY

- ◆ **Male & Female Population**
- ◆ **Geo-geographical Area**

This section depicts the information/data of States/UTs in respect of Indian demography containing male-female population and geo-geographical area of the country.

Male & Female Population

Demography is the statistical study of populations, especially human beings. As general science, it can analyze any kind of dynamic living population, i.e., one that changes over time or space and in response to birth, migration, aging and death.

Its analysis can cover whole societies or groups defined by criteria such as education, nationality, religion and ethnicity. Demographic studies also analysed the relationships between economic, social, cultural and biological processes influencing a population.

The total population of India as on 01.10.2017 provided by Registrar General and Census Commissioner of India stood at 128.7 crore approx, comprising 66.9 crore males and 61.8 crore females.

Among the States, Uttar Pradesh with a population of more than 22.34 crore holds distinction of being the most populous state in the country followed by Maharashtra with a population of 12.23 crore.

Among the Union Territories, Delhi with a population of more than 2.23 crore holds distinction of being the most populous UT in the country followed by Chandigarh with a population of 0.19 crore.

Geo-graphical Area

The total geo-graphical area of the country is 31,66,414 sq.km approximately. The largest state in India in terms of geographical area is Rajasthan with an area of 3,42,111 sq.km and the smallest state is UT of Lakshadweep with an area of 30 sq.km.

The constitution lays down the general principles of affirmative action for SCs and STs. Other backward Class (OBC) is a collective term used by the Government of India to classify castes which are socially and educationally disadvantaged. It is one of the several official classification of the population in India, along with Scheduled Castes and Scheduled Tribes (SCs and STs).

This section provides State/UT wise information about reservation of Scheduled Castes (SCs), Scheduled Tribes (STs) and Other Backward Classes (OBCs) in police force from the rank of Sub-Inspector to Constable. - ◆ **Actual Strength of Women in Traffic Police**
- ◆ **Actual Strength of Women in Special Branch of Police dealing with Intelligence.**
- ◆ **Actual Strength of Women in CID/ Crime Branch**
- ◆ **Actual Strength of Women in Special Police Unit**

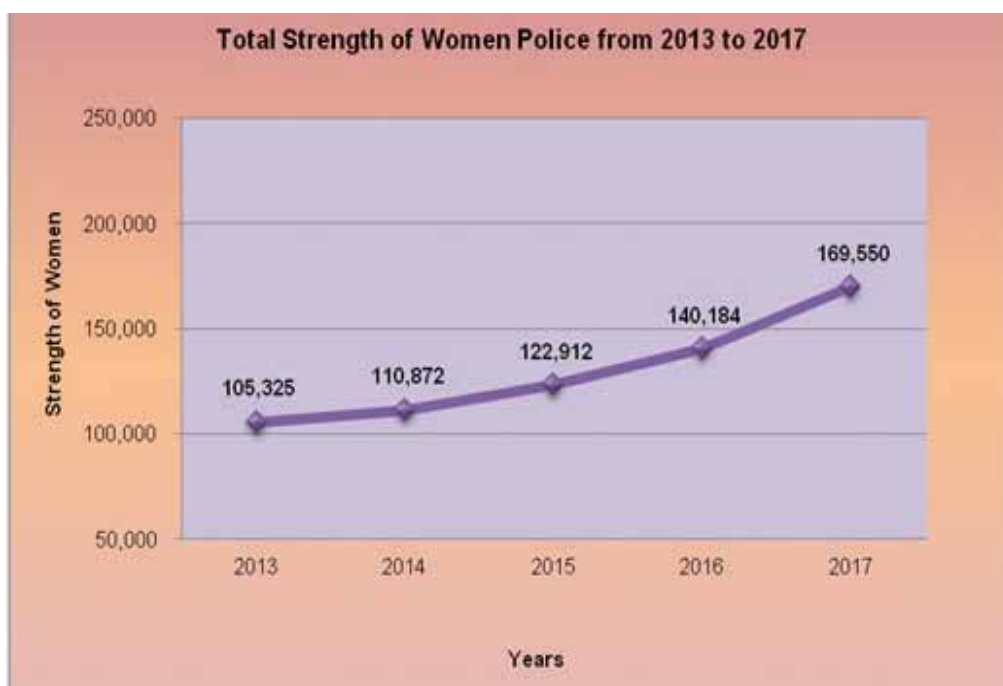

Availability of adequate women in police is essential for reducing the vulnerability of women becoming victims of crime. It is seen that the existing women police population ratio is still very low which should be increased. As the people in distress first come in contact with the police and then, a chain of events takes place in the form of medical examination of the victims, recording of statement before the Magistrate, assigning the case to public prosecutor and appearance in the Court proceedings. Overall shortage of women police personnel is posing challenges in the form of increased crimes against women, thereby emphasizing the need to bring women police to frontline duties.

It is essential that women are visible at the cutting edge level of public interface. There is a tendency to engage women police only in situations like security checks and other specialized duties relating to women, but unless they are assigned main stream duties in the police stations, there would not be adequate impact on the community.

Strength of Women Police

Total strength of Women in police from 2013 to 2017 has shown an increasing trend which is self-explanatory from the graph.

At present, actual strength of total women police (Civil+DAR+Armed) is
