FOREWORD

The Bureau of Police Research & Development (BPR&D) has been striving, over the last five decades, to bring about transformation in the processes for ensuring efficient law enforcement and service delivery by the Indian Police. Intrinsic to this objective is the need for effective planning, optimised utilisation of resources and provisioning of equipment for the police forces.

In an effort to address this need, the BPR&D has undertaken publication of the Compendium of Equipment purchased by various police organisations. The last edition of this document was published in the year 2014.

In a significant change, the listings in this edition, covering the period from April, 2014, to March, 2019, have been classified equipment-wise, as against organisation-wise, as was done in the previous issue. This compendium is a result of the dedicated endeavours of Shri Karuna Sagar, IPS, IG/Director (Modernisation), and his team, comprising Dr. Raveesh Kumar, PSO (W), and Shri Saroj Mukesh Kumar, DEO. I record my deep appreciation for their hard work and focussed efforts.

I also express my sincere thanks to all CAPFs and police forces of States & UTs, who have collaborated with us in this effort, and enabled us to publish this document.

I believe, this compendium shall be a useful ready reckoner to all stakeholders.

Suggestions for further improvement in the content and presentation are welcome.

(V.S.K. Kaumudi)

EXECUTIVE SUMMARY

The need for a comprehensive and updated manual of Reference for use by Law Enforcement Authorities (LEAs) and Central Armed Paramilitary Forces (CAPFs) of the entire country is the quintessential raison d'être for this publication. The process of procurement optimisation involves many sub-radials of availability, cost, quality, reliability and organisational acquisition history. Whilst striving for economical and efficient procurement, data of earlier purchases by sister organisations in respect of targeted products is very helpful and saves time and effort. The Compendium of Equipment fulfils this need.

The work of publishing this compendium commenced in February 2018. The Police Headquarters of 29 States & 6 Union Territories along with 7 CAPFs (42 agencies in all) were requested to forward the data of equipment purchased during April 2014 to March 2018 under 12 categories (Security Gadgets, Weaponry, Communication, Information Technology, Machinery & Equipment, Medical, Forensic, Transport apparatus, Traffic, Training, Clothing & Tentage and Building paraphernalia) in a specific BPR&D format. Till September 2019, only 12 organisations forwarded their data. With persuasion, this number rose to 21 till December 2019. In the beginning of 2020, a decision was made to include the data till March 2019 to make the compendium more useful and updated.

With rigorous follow up, more data came in and was promptly incorporated in current issue. This enabled the document to become comprehensive and exhaustive, as complete inputs from all 42 agencies could be included. Further, it catalysed a systemised organisation of data, which can be mined by users in a methodological and result-oriented approach. I thank all CAPFs, headquarters of all state and UT police for providing the requisite data in the prescribed format.

In a significant change, the listings in this issue of compendium have been classified equipment-wise (as against the earlier edition, wherein it had been listed State/UT-wise). Equipment and items have been classified into 11 categories which have been further divided into various sub categories, which includes purchasers of the specific item. This feature has been incorporated to render the compendium more user-friendly.

As the data provided by our police organisations and CAPFs is significantly voluminous, it has been decided to publish this issue in four volumes (I, II, III, & IV) to facilitate easier reference and handling. Volume I includes Security Gadgets, Machinery & Equipment and Forensics. Volume II has been devoted to Information Technology and Medical equipment, Volume III contains Communication, Transport & Traffic and Building paraphernalia and Volume IV lists data on Weapons, Clothing & Tentage items and Training.

We hope that this updated publication fills the void projected by LEAs and CAPFs, and that it optimises the effort and time needed for data mining.

A handwritten signature in blue ink, followed by the date '2.3.2020' written below it.

(Karuna Sagar, IPS)
